George Mason University is an educational institution and agency of the Commonwealth of Virginia.

II. **PURCHASING MANUAL/GOVERNING RULES:** This solicitation and any resulting contract shall be subject to the provisions of the Commonwealth of Virginia *Purchasing Manual for Institutions of Higher Education and their Vendor’s*, and any revisions thereto, and the *Governing Rules*, which are hereby incorporated into this contract in their entirety. A copy of both documents is available for review at: https://vascupp.org

III. **COMMUNICATION:** Communications regarding the Request For Proposals shall be formal from the date of issuance until a contract has been awarded. Unless otherwise instructed offerors are to communicate with only the Procurement Officers listed on the cover page. Offerors are not to communicate with any other employees of Mason.

IV. **FINAL CONTRACT:** ATTACHMENT B to this solicitation is Mason’s standard two-party contract. It is the intent of this solicitation to base the final contractual documents off of Mason’s standard two-party contract and Mason’s General Terms and Conditions. Any exceptions to our standard contract and General Terms and Conditions should be denoted in your RFP response. Other documents may be incorporated into the final contract, either by way of attachment or by reference, but in all cases this contract document and Mason’s General Terms and Conditions shall jointly take precedence over all other documents and will govern the terms and conditions of the contract.

V. **ADDITIONAL USERS:** It is the intent of this solicitation and resulting contract to allow for cooperative procurement. Accordingly, any public body, public or private health or educational institutions, or affiliated corporations may access any resulting contract if authorized by the contractor.

Participation in this cooperative procurement is strictly voluntary. If authorized by the Contractor(s), the resultant contract(s) will be extended to the entities indicated above to purchase goods and services in accordance with contract terms. As a separate contractual relationship, the participating entity will place its own orders directly with the Contractor(s) and shall fully and independently administer its use of the contract(s) to include contractual disputes, invoicing and payments without direct administration from the University. No modification of this contract or execution of a separate agreement is required to participate; however, the participating entity and the Contractor may modify the terms and conditions of the contract to accommodate specific governing laws, regulations, policies, and business goals required by the participating entity. Any such modification will apply solely between the participating entity and the contractor.

The University may require the Contractor provide semi-annual usage reports for all entities accessing the contract. The University shall not be held liable for any costs or damages incurred by any other participating entity as a result of any authorization by the Contractor to extend the contract. It is understood and agreed that the University is not responsible for the acts or omissions of any entity and will not be considered in default of the contract no matter the circumstances.

Use of this contract(s) does not preclude any participating entity from using other contracts or competitive processes as needed.

VI. **eVA BUSINESS-TO-GOVERNMENT VENDOR REGISTRATION:** The eVA Internet electronic procurement solution, website portal www.eVA.virginia.gov, streamlines and automates government purchasing activities in the Commonwealth. The eVA portal is the gateway for vendors to conduct business with state agencies and public bodies. All vendors desiring to provide goods and/or services to the Commonwealth shall participate in the eVA Internet eProcurement solution by completing the free eVA Vendor Registration. All bidders or offerors agree to self-register in eVA and pay the Vendor Transaction Fees prior to being awarded a contract. Registration instructions and transaction fees may be viewed at: https://eva.virginia.gov/

IX. **PERIOD OF PERFORMANCE**: One (1) year from date of award with four (4) successive one-year renewal options.

X. **BACKGROUND**: The George Mason University (“GMU” or “Mason”) is the largest public research university in Virginia, serving more than 38,000 students from all States and over 130 countries. Our identity was forged in 1972 building upon Virginia’s strong ideals of academic excellence and service. Today, that spirit energizes us as a leader in scholarship and research; preparing career-ready graduates who are able to meet the complex needs of a rapidly changing world. As Virginia’s largest public research intensive (R1) university, we set the standard for a bold, progressive education that serves our students and communities. As a public, comprehensive, research university established by the Commonwealth of Virginia in the National Capital Region, our mission is to be an innovative and inclusive academic community committed to creating a more just, free, and prosperous world. In short, Mason seeks to be the best university for the world.

A. **Project Background – About the College of Health and Human Services and its Population Health Center**: The College of Health and Human Services (“College”) is 1 of 10 colleges and schools comprising George Mason University, and is led by its Dean, Dr. Germaine Louis. The College is recognized as the health college on campus and offers 5 undergraduate, 12 graduate and 11 certificate degree programs along with 9 online degree programs. Students are prepared for a variety of health careers in public, private, and not-for-profit employment settings, including as health care administrators, leaders, providers, and researchers. Currently, the College comprises a School of Nursing and five academic departments: Global and Community Health; Health Administration and Policy; Nutrition and Food Studies; Rehabilitation Science; and Social Work. In addition, the College is currently home to three research centers: 1) Center for Health Care Policy Research and Ethics; 2) Center for the Study of Chronic Illness and Disability; and 3) Center for Discovery Science and Health Informatics. These centers conduct multidisciplinary research focusing on pressing public health issues, while providing support for College faculty and students. The College is currently building doctoral degrees in public health as it transitions to become Virginia’s first independent college of public health.

In October 2019, the College opened its Population Health Center (PHC) whose mission is to:
1) advance the public’s health and eliminate disparities through the delivery of inter-professional health care; 2) design and implement innovative research of consequence; and 3) continually develop a professional health care workforce. The PHC is a state-of-the-art clinical and research enterprise located in a two-story (≥3,500 sf) building annexed to the Peterson Family Health Sciences Hall (≥3165,000 sf) where the College is located. Other unique features include an electronic health record system and a telehealth hub. The PHC builds partnerships between academic and community partners in the provision of primary and behavioral health care and chronic disease management for underserved populations with the opening of the 10th Mason and Partners Clinic. Being telehealth ready, the PHC will soon be providing care to 10 remote communities. Clinical teams work in partnership with community organizations to provide prescription medications and to address the social determinants, such available housing and food, necessary for health.

Briefly, the PHC’s infrastructure includes 3 adult and 1 pediatric examination rooms, 3 behavioral health rooms, 1 intake and 1 interview room, and offices. Specialty equipment includes: bone densitometry (dual energy x-ray absorptiometry, DEXA), functional magnetic resonance imaging (fMRI), ultrasonography, and gait and metabolic technologies. The PHC is able to collect, process and store (short- and long-term) biospecimens utilizing the services of a CAP/CLIA certified laboratory on campus.

The PHC infrastructure is designed to support a wide variety of research, such as families and college students, using a variety of designs (e.g., clinical trials and cohort studies with longitudinal data collection). Most clinical services provided in the PHC are delivered by doctoral-level nurse practitioners and clinical social work faculty along with their trainees. Currently, the PHC’s staff includes a clinic coordinator, study coordinator, medical assistant, and an intake receptionist.

B. **Project Introduction**: The College seeks a professional and knowledgeable health care consulting organization that can assess existing budget models and supporting services while offering new options for the provision of health care services, in support of clinical practice, training, and research, irrespective of reimbursement mechanism. This approach is consistent with the College’s mission to serve its various constituencies throughout Virginia, and to do so in a sustainable manner. Options might include the expansion of or implementation of new population health clinical offerings along with sustainable revenue streams and practice plans. In short, the College is open to exploring new opportunities while maximizing existing ones, such as the MAP clinics.
To be successful in promoting the public’s health, the College seeks advice on the business operations and fiscal sustainability of its 10 MAP clinics and in building new clinic opportunities for the provision of primary and behavioral care (e.g., behavioral health, chronic disease management, pediatrics, weight loss and management, women’s health). Funded primarily through an academic partnership model and supplemented by federal and foundation funding, the MAP clinics serve the uninsured, immigrant, and refugee communities in Northern Virginia through integrated primary care and behavioral health services. While financially viable and operating well at this time, the College seeks assessment of the clinics’ business operations, as well as strategies for the clinics’ long-term fiscal stability.

The College has as its primary need the assessment of its current clinical care model along with the identification of new health care options for delivering quality care. With the opening of the Population Health Center, the College is now positioned to offer novel approaches to population health services, such as developing specialty care (e.g., novel approaches to telehealth, cognitive behavioral or mindfulness therapies, friend- or couple-based weight loss) clinics. To do so requires an empirical assessment of various reimbursement strategies to offset costs associated with the provision of services, including those with reimbursable services through federal, public or private health plans. For example, the Population Health Center might offer services under a value-based payment arrangement or to include a federally qualified health care center.

A second critical need is to establish rate setting and contractual practices that align with its services, and strategies for any associated billing services. Such services might be internal or external to Mason, in light of limited internal capacity.

A third critical need is to assess the utility and feasibility of establishing a faculty practice plan where faculty providing clinical care would receive partial compensation from billable services. Currently, Mason does not have a faculty practice plan (as it has no medical or dental school).

Collectively, these 3 priorities constitute the basis for the statement of work listed below.

**XI. STATEMENT OF NEEDS:** Mason

This project will be executed in 3 phases responsive to meeting the critical needs listed in the text above. Offerors should prepare their proposals to address each phase delineating how they will provide the following services and timeline. The budget should be structured to reflect total costs and costs for each phase of the proposal.

**Phase 1: MAP Clinics Business and Sustainability Evaluation** (addressing above critical need 1)

- Review current business operations and structures of the MAP clinics
- Review historical financial performance of the MAP clinics
- Forecast the long-term fiscal and operational sustainability of the MAP clinics
- Summarize above findings

**Phase 2: Assessment of Existing Population Health Services and Recommendations for Health Care Plan Options that the College can Provide** (addressing above critical need 2)

- Evaluation of the Northern Virginia population health-related environment that are applicable to the College and its Population Health Center, including:
  - Assessment of existing health care provider structures and services
  - Needs assessment identifying opportunities to positively impact health through the provision of health care services
- Review of Mason’s and the College’s current clinical and health care services related to population health
- Options for positioning the College as it transitions to become a College of Public Health in providing the following services, including:
  - Establishment of primary and specialty care clinics responsive to community needs
  - Operational structures for clinic operations (management, services and research)
  - Fiscal implications of potential structures and operations
  - Governance options

**Phase 3: Options for Establishing Faculty Practice Plan** (addressing above critical need 3)

- Assessment of various options related to the establishment of a Faculty Practice Plan related to the above endeavors and other clinical operations within the College.
Identification of potential revenue streams and ranges of potential revenue along with identified risks
- Recommendations and timeline

**Deliverables:** Project deliverables should include, but not be limited to, the following components, as listed below by phase. Of note, use of publicly available data to support demand and forecasting estimation is encouraged with assumptions formalized for all modeling scenarios. Offerors are expected to provide a detailed approach, including estimated hours and rates (and other, relevant expenses) for each Workstream along with supporting justification. Deliverables should be prepared using Microsoft Office products in an electronic format.

**Phase 1 Workstream:**
1. Evaluate the MAP clinics’ current business operations and structures and develop recommendations for long-term sustainability using best practices

2. Report with recommendations regarding the MAP clinics’ current and future fiscal performance. This shall include:
   a. Potential options for funding
   b. High-level financial modeling.
   c. Five-year funding sustainability for the MAP clinics.
   d. Options and recommendations for other long-term financial sustainability for the MAP clinics.

**Phase 2 Workstream:**
1. Document and evaluate Northern Virginia’s population health environment that is relevant to the College’s potential options.
2. Evaluate the College’s current and future clinical and population health-related services relative to community need.
3. Provide recommendations on long-term positioning (structures, operations, financing) of the College’s population health-related offerings.

**Phase 3 Workstream:**
1. Provide recommendations as to possible faculty practice plan models for implementation in the College. Particular attention to non-physician models is requested to align with the College’s mission.

**XII. COST OF SERVICES:** See XIII., B., 4.

Such measures will be no less protective than those used to secure Contractor’s own data of a similar type, and in no event less than reasonable in view of the type and nature of the data involved. At a minimum, Contractor shall use industry-standard and up-to-date security tools and technologies such as anti-virus protections and intrusion detection methods to protect University Data.

Immediately upon becoming aware of circumstances that could have resulted in unauthorized access to or disclosure of University Data, Contractor will notify Mason, fully investigate the incident, and cooperate fully with Mason’s investigation of and response to and remediation of the incident. Except as otherwise required by law, Contractor will not provide notice of the incident directly to individuals who’s PII was involved, regulatory agencies, or other entities, without prior written permission from Mason.

If Contractor provides goods and services that require the exchange of sensitive University Data, the Data Security Addendum attached to this Contract provides additional requirements Contractor must take to protect the University Data. Mason reserves the right to determine whether the University Data involved in this contract is sensitive, and if it so determines it will provide the Data Security Addendum to Contractor and it will be attached to and incorporated into this contract. Types of University Data that may be considered sensitive include, but is not limited to, (1) PII: (2) credit card data; (3) financial or business data which has the potential to affect the accuracy of the University’s financial statements; (4) medical or health data; (5) sensitive or confidential business information; (6) trade secrets; (7) data which could create a security (including IT security) risk to Mason; and (8) confidential student or employee information.

Mason reserves the right in its sole discretion to perform audits of Contractor, at Mason’s expense, to ensure compliance with all obligations regarding University Data. Contractor shall reasonably cooperate in the performance of such audits. Contractor will make available to Mason all information necessary to demonstrate compliance with its data processing obligations. Failure to adequately protect University Data or comply with the terms of this Contract with regard to University Data may be grounds to terminate this Contract.

MM. UNIVERSITY DATA UPON TERMINATION OR EXPIRATION: Upon termination or expiration of the Contract, Contractor will ensure that all University Data are securely returned or destroyed as directed by Mason in its sole discretion within 180 days of the request being made. Transfer to Mason or a third party designated by Mason shall occur within a reasonable period of time, and without significant interruption in service. Contractor shall ensure that such transfer/migration uses facilities and methods that are compatible with the relevant systems of Mason or its transferee, and to the extent technologically feasible, that Mason will have reasonable access to University Data during the transition. In the event that Mason requests destruction of its data, Contractor agrees to destroy all data in its possession and in the possession of any subcontractors or agents to which the Contractor might have transferred University Data. Contractor agrees to provide documentation of data destruction to the University.
Contractor will notify the University of any impending cessation of its business and any contingency plans. This includes immediate transfer of any previously escrowed assets and University Data and providing Mason access to Contractor’s facilities to remove and destroy Mason-owned assets and University Data. Contractor shall implement its exit plan and take all necessary actions to ensure a smooth transition of service with minimal disruption to Mason. Contractor will also provide a full inventory and configuration of servers, routers, other hardware, and software involved in service delivery along with supporting documentation, indicating which if any of these are owned by or dedicated to Mason. Contractor will work closely with its successor to ensure a successful transition to the new equipment, with minimal downtime and effect on Mason, all such work to be coordinated and performed in advance of the formal, final transition date.

NN. UNIVERSITY REVIEW/APPROVAL: All goods, services, products, design, etc. produced by the Contractor for or on behalf of Mason are subject to Mason’s review and approval.

OO. WAIVER: The failure of a party to enforce any provision in this Contract shall not be deemed to be a waiver of such right.
